DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I (claims 1-27) in Paper No. 10, filed 4/5/03, is acknowledged. Claims 1-41 are pending in the instant application with claims 28-41 withdrawn from consideration as being directed towards a nonelected invention.

Information Disclosure Statement

Receipt is acknowledged of two information disclosure statements, filed 5/24/02 and 7/30/02 as Papers No. 7 & 8, respectively. The PTO Form 1449 for Paper No. 8 has been mailed with this action. The information disclosure statement filed in Paper No. 7 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered. If applicants wish these documents to be considered, it will be necessary to submit new copies of each of the references.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-27 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1636

Claims 1 and 16 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. Each of the claims comprises the limitation "wherein upon expression of said polynucleotide in a prokaryotic host cell, the light and heavy chains are folded and assembled to form a biologically active immunoglobulin". The specification, however, teaches that the proteins must be secreted in order for them to fold properly and form a biologically active immunoglobulin (e.g. see page 28, lines 8-11). It would be remedial to amend the claims to include this essential element of the invention.

Conclusion

No claims are allowed.
